PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer and CSE student (graduating 2026) with hands-on experience building scalable web applications, RESTful APIs, and AI-powered systems. National Finalist — Smart India Hackathon 2024 (86,000+ teams). SIH 2025 1st Place Winner. Co-Founder of ChargeOne, recognised as Best Startup at StartupTN (Government of Tamil Nadu). Delivered 6+ production projects with measurable performance gains; mentored 150+ students in full-stack development.

EXPERIENCE

Full-Stack Developer Intern — Arjun Vision Tech Solutions

05/2024 – 06/2024

- Optimised PostgreSQL queries using advanced indexing — slashed response time from **800 ms** → **120 ms (85% improvement)**, directly improving user-perceived latency for 1,000+ daily requests.
- Built a scalable JWT authentication system with token refresh, blacklisting, and role-based access control, achieving 100% secure token integrity across all API endpoints.
- Engineered server-side pagination & filtering algorithms enabling **sub-200 ms data retrieval** over datasets exceeding 50,000 records.

Freelance Full-Stack Developer — Madha Medical College & Research Institute

04/2026 – 05/2026

- Architected a high-performance web platform scoring **98/100 on Google Lighthouse** — top 2% performance for production websites.
- Reduced page load time by **40%** via code splitting, lazy loading, and CDN asset delivery, serving 500+ concurrent users.
- Drove **25% organic traffic growth** through semantic HTML, structured data (JSON-LD), and on-page SEO improvements.
- Delivered the full solution on time with 100% client satisfaction, managing requirements, design, and deployment end-to-end as a solo developer.

PROJECTS

BOTCHA — AI Passive Bot Detection & Mitigation | React · Node.js · TensorFlow · Scikit-learn

10/2024 – 12/2024

- Built a production ML pipeline processing **10,000+ user interaction events/sec** (mouse, click, scroll biometrics) for real-time bot classification with <50 ms inference latency.
- Achieved **94% bot detection accuracy** on held-out test data, outperforming rule-based baselines by 31 percentage points.
- Selected as **National Finalist — Smart India Hackathon 2024** from 86,000+ competing teams (4.9 lakh participants).

MAITRI — AI Astronaut Assistant Platform | PostgreSQL · Redis · Express.js · OpenAI API

11/2024 – 01/2025

- Engineered a PostgreSQL + Redis architecture handling **500+ concurrent AI interactions** with real-time emotion analysis and mission-critical issue reporting.
- Built 20+ RESTful APIs with comprehensive error handling, maintaining **99.7% uptime** under simulated mission-load conditions.
- Led 6-member team to **1st place at SIH 2025** (institute selection) among 500+ competing teams.

EDUCATION

B.E. Computer Science Engineering	Saveetha Engineering College	GPA: 7.5	2022 – 2026
Senior Secondary (12th)	Velammal Nexus, CBSE	80%	2022

TECHNICAL SKILLS & KEY ACHIEVEMENTS

Languages	Python, Java, JavaScript (ES6+), TypeScript	Smart India Hackathon 2024 — National Finalist: Led 6-member team to top 5 of 86,000+ competing teams (4.9 lakh participants) nationwide for an AI-powered government-use product. Smart India Hackathon 2025 — 1st Place Winner: Secured top position among 500+ institute teams; built MAITRI, an AI astronaut assistant with real-time emotion analysis. ChargeOne — Best Startup (StartupTN, Govt. of Tamil Nadu): Co-founded an EV payment gateway startup; won Startify Innovation Program and recognised by the Government of Tamil Nadu. College House Captain: Led 1,000+ students, delivering the house's first-ever 2nd Runner-Up finish in college history through strategic planning and team coordination. Technical Educator: Facilitated full-stack development workshops training 150+ students; spearheaded media team achieving 150% growth in social media engagement.
Frontend	React, Next.js, HTML5, Tailwind CSS, Redux	
Backend	Node.js, Express.js, REST APIs, GraphQL, JWT, Microservices	
DB & Cache	PostgreSQL, MongoDB, Redis, MySQL, Query Optimisation	
Cloud & DevOps	AWS (EC2, Lambda, S3), Docker, Kubernetes, Jenkins, GitHub Actions	
AI Tools	GitHub Copilot, Cursor, Claude Code, OpenAI API, Anthropic API, LangChain, LangGraph	
Concepts	DSA, System Design, OOP, Agile/Scrum, Load Balancing, Caching Strategies	

CERTIFICATIONS

- Microsoft Azure AI Engineer Associate | Google Cloud Engineer Track | Data Structures & Algorithms — NamasteDev
- Introduction to Data Science in Python — Coursera | MongoDB Basics — MongoDB University | Intro to Embedded ML — Coursera
